Attention Prescribers and Pharmacies: Mandatory Three-Month Supplies for Maintenance Medications

Effective February 20, 2017, the following list of medications will be required to be filled in three-month (100-day) supplies. A one-time initial fill of less than three months will be allowed for the first fill to assure tolerability and compliance.

Oral and Topical Contraceptives
Antiarrhythmics
Estrogens
Progesterone
Antidiabetics
Antihypertensives
Diuretics
Cardiac Glycosides
Antianginals

Anticonvulsants and Thyroid preparations will not be mandatory.

Medications administered in a long-term care facility and physician's offices are exempt from the three-month supply requirement.
